SUMMARY

Information Technology undergraduate and Founding Head of Engineering at FschoolAI building LLM applications, AI agents and full-stack web products in Python, TypeScript and C++. Shipped streaming LLM features to production, built RAG and semantic search pipelines, and ranked in the top 2% of 13,000+ in an open-source coding program.

EXPERIENCE

FschoolAI (fschoolai.com) Sep 2026 - Present

Founding Head of Engineering (intern) | San Francisco, CA (Remote) | TypeScript, React, Supabase, LLM APIs

- Lead MVP delivery for an AI study platform, setting priorities for a team of 8 shipping an AI tutor, live AI whiteboard rooms and an LLM Course Maker in TypeScript and React.
- Cut AI tutor time-to-first-token from 14.9 s to 1.5 s by picking models from measurement (Haiku 0.7 s vs Gemini Flash-Lite 5.6 s), turning off thinking on streamed turns, and routing turns with a rule-based planner instead of a model call.
- Fixed RAG grounding: course material reached only 0.1% of room turns because embeddings were built from prompt boilerplate and the search skipped the course corpus.
- Built per-student LLM cost ledgers ($4/month cap, $0.27 mean) that drop heavy users to a cheaper model tier instead of cutting them off, with TTFT and cost-per-user monitoring.
- Built cross-provider LLM failover with stream rescue, so one provider outage no longer breaks a session.
- Shipped a Course Maker that turns a Canvas syllabus into a full course, an onboarding interview saved to student memory, and a safety filter that keeps self-harm language out of memory without a model call.

PROJECTS

Mr. Couch - Desktop AI Agent | TypeScript, Electron, Gemma 4, Mastra github.com/ronaksarda/couch

- Built a voice and text AI agent for Windows that opens files, plays media, reads the screen and controls smart-home devices.
- Designed a tiered safety policy in code: read-only actions run, changes need user confirmation, destructive actions do not exist.

GitSpace | JavaScript, Node.js, Express, PostgreSQL, C++17, HTML5 Canvas gitspace.me

- Built and deployed a full-stack web app that renders any GitHub account as an interactive 2D world; live on Render, 30+ users.
- Wrote a C++17 spatial layout engine with a JavaScript fallback at 60 FPS; raised tested capacity from 2,500 to 80,000+ repos.

Candidate Ranker - Hack2Skill Hackathon | Python, Sentence-Transformers, MiniLM github.com/ronaksarda/candidate-ranker

- Built a solo, offline ML pipeline that ranks 100,000 applicants against a job description in under 5 minutes on one CPU.
- Designed a 3-stage funnel: keyword filter to top 3,000, MiniLM semantic embeddings, then weighted scoring.

LabelSure AI - Smart India Hackathon | Python, FastAPI, Vision LLM, Tesseract OCR github.com/ronaksarda/SIH-Project

- Built a compliance checker that audits product labels and e-commerce listings against 14+ Legal Metrology rules.
- Cut LLM hallucination by running a vision LLM and OCR in parallel, cross-checking key fields before a rules engine.

EDUCATION

Chaitanya Bharathi Institute of Technology (CBIT) Aug 2025 - May 2029 (expected)

B.E. Information Technology | Hyderabad, India | CGPA: 8.68 / 10 (first year)

Stanford University (Stanford Online) 2026 - Present

Probability for AI (in progress)

TECHNICAL SKILLS

Languages: Python, TypeScript, JavaScript, C++, C, SQL, HTML, CSS
AI and ML: LLM APIs, AI Agents, RAG, MCP, Hugging Face, Sentence-Transformers, Embeddings, OpenCV, NumPy, Pandas
Web and Databases: React, Node.js, Express.js, FastAPI, Electron, PostgreSQL, Supabase, Firebase, REST APIs
Cloud and Tools: Microsoft Azure, Google Cloud, Git, GitHub, Linux, Render, VS Code

CERTIFICATIONS

- Microsoft Certified: Azure Fundamentals | GitHub Foundations | Microsoft Applied Skills: Agents in Microsoft Foundry
- Google Cloud Skill Badges (34 earned, Google Cloud Facilitator 2026) | Hugging Face: Fundamentals of Agents | CS50x (Harvard)

LEADERSHIP AND ACHIEVEMENTS

- ECSoC '26: ranked 138 of 13,000+ | HackerRank Orchestrate: ranked 329 of 1,773 | CBIT COSC HackWeek: Top 7 of 800+
- Organizer, HackIndia Spark11 (2,500+ participants, 550 teams); Coordinator, SIH internal round (400+ teams).
- LeetCode: 334+ problems solved | HackerRank Gold Badges in C and C++ | Reached Round 2 interview at Citadel Securities.
